# German Simmental - robust and fit for milk & meat

**Robust milk production with all the talent for a quality-oriented mast:**

**the characteristics from the German Simmental cattle.**

With the classical dual-purpose bovine animal you profit in the developments on the milk as well as on the beef market. With other words: German Simmental is the first choice to ensure against market risks!

In the focus of the German Simmental breeding stands the production of a strong dual-purpose bovine animal ready for achievement. A look at the composition of the whole breeding value proves that the area of fitness is still put before the areas of milk or meat production. An improvement of the protein amount, the life performance as well as the fitness of the animals is aimed – without retention of the meat achievement.

Milk achievement above the 7.000 kg border (4.2% of fat, 3.7% of protein) is just as normal as milk achievement above the 10.000 kg border. A more intensive look at the statistics proves the influence of good management and the natural circumstances under which the bovine animals are held. This has to be considered when selecting the animals.

The male calves of this race are suited very well for the intensive mast. With a daily gain above 1,300 g the bulls reach their average slaughter weight at the age of 16 - 18 months – with a dressing percentage up to 60%! The Haller AG offers you security by the preparation and the handling of your breeding and feeder cattle farms from the start. Our tradition-respecting enterprise is known as a competent supplier of services all around cattle trade both in national and international measures.

Whether selection of the animals on site, winding up all default administrative documentation or after sales support: Haller is your partner for the breeding cattle purchase.

Of course we consult and help also in all questions around the financing. Call us!

Haller is your partner for the breeding cattle purchase.

Haller – with us your animals arrive safe to the stable.

## Simmental cattle population in Germany

Number of Simmental cattle	3,52 mio
From which milk cows	1,19 mio
Cows under milk performance test	909000
Active breeding population	858000
Herd book cows	65700

## Milk and meat production (big deviation)

- Average of all cows under milk performance test:  
6.548 kg milk – 4, 15% fat – 3, 49% of protein with a somatic cell count of 142,000 cells / ml.
- Bulls from top fattening farms reach daily gain of 1,400 g and a dressing percentage of 60%.  
A genetic that opens new perspectives!
