# German Swiss cattle - solidly & highly competitive

The hectic market movements of the last years have shown that it not always makes sense, to put all your eggs in one basket: German Swiss cattle offers you the opportunity, to secure against the alternations of the agricultural market.

As a classical dual-purpose race the German Swiss cattle offers milk performance in combination with prominent mast qualities.

With 8.000 kg – 9.000 kg milk production and content materials of 7% – 8% is the German Swiss cattle in the Southwest of Germany resident. The race offers functional cows with the best foundations and excellent udder, besides, the animals produce reliably in all conditions. The really good-natured animals are the best utilizers of forage and, furthermore, are productive and robust.

The distinctive climate tolerance of the German Swiss cattle qualifies this race even for the application in tropical regions. There it is in pure breeding or, however, within the crossing programmes as a mainstay of the food security in emerging economic regions.

The Haller AG offers you security by the preparation and the handling of your breeding and feeder cattle farms from the start. Our tradition-respecting enterprise is known as a competent supplier of services all around cattle trade both in national and international measures.

Whether selection of the animals on site, the winding up of all default administrative documentation or after sales support: Haller is your partner for the breeding cattle purchase.

Of course we consult and help also in all questions around the financing. Call us!
